OBJECTIVE

A dedicated and passionate aspiring developer with strong foundational programming and web development skills. I am committed to applying my technical knowledge to real-world challenges, building innovative solutions, and growing alongside a professional team.

EDUCATION

BSc (Hons) Computing 2023 - Present

Islington College

London Metropolitan University

Kamal Marg, Kamalpokhari, Kathmandu

SLC 2017 - 2019

Einstein Academy

National Examination Board

Mahalaxmasthan, Lalitpur

SEE 2017

United School

National Examination Board

Satdobato, Lalitpur

SKILLS

Technical Skills:

Programming Language: Python, HTML/CSS, Java, JavaScript, SQL

Frameworks/Libraries: Django, React.js, NumPy, Pandas

Databases: MySQL, PostgreSQL

Tools and Software: Git, GitHub, VS Code, Eclipse, Jupyter Notebook

Soft Skills:

Cooperative, Effective Time Management, Desire to Learn, Adaptability to Change, Strong Attention to Detail

PROJECTS

Personal Projects:

Marketplace/E-Commerce Website | [Django, Python, PostgreSQL](#)

- Developed an e-commerce platform using Django, applying core concepts such as the MVT architecture, model creation, URL routing, views, and template rendering with static and media file handling.
- Integrated features like admin panel configuration, base template inheritance, image upload and display and dynamic data display using Django's template engine.

Academic Projects:

E-Commerce Website | [Html](#), [CSS](#), [JavaScript](#)

- Developed an e-commerce website focusing on engaging, user-friendly experience using HTML, CSS, and JavaScript.
- The site features multipage navigation, including a home page, products page, an about section, blog posts with client-side form validation using JavaScript functions, addressing the need for data accuracy and a smoother user experience.

Library Management System | [Java](#), [MySQL](#)

- Implemented full CRUD functionality with secure authentication and role-based access, following the MVC architecture for clean and maintainable backend logic.
- Gained practical experience in backend development, session handling, and API-like request/response flows, simulating real-world server-side processing.

Furniture Management System | [Python](#)

- Developed a Python-based Furniture Management System that efficiently manages furniture inventory by reading and updating data from a structured text file.
- Key features included real-time inventory tracking for multiple items, invoice generation with details, timestamps, and cost breakdown and comprehensive input validation and error handling for reliable user interaction.

TRAINING AND CERTIFICATIONS

- **AWS Academy Graduate (AWS Academy Cloud Foundations)**

Issued by: Amazon Web Services (AWS)

Gained foundational knowledge of cloud computing concepts, AWS core services, architecture practices, and security.

- **Programming Foundations (LinkedIn)**

Issued by: LinkedIn Learning

Learned about core programming concepts including algorithms, variables, loops, conditionals and pseudocode. Served as a strong base for further software development training.

- **Python Essential Training (LinkedIn)**

Issued by: LinkedIn Learning

Gained hands-on experience in core Python programming, including data types, functions, control structures, file operations, and object-oriented programming techniques.
